Read the following passage and answer the questions given below (72-81):

A private workplace always looks like a modern school that a curriculum of things should be offered so that the always had a working atmosphere someone was approaching the room where she wrote. William Faulkner, looking a look on his study door, detached the door knob and brought it into the room with him. Mark Twain's family knew better than to knock his study door—they would blow a horn or draw him out. Graham Greene never even looked at the door of his study. After all, the address and the telephone number. After all, someone of us needs a workplace where we can work on our creative ideas. Equally we need our private space too!

A daily walk has always been a source of inspiration. For many years, a regular walk was generally a creative inspiration. Charles Dickens himself took three hour walks every afternoon, and what he observed on them fed directly into his writing. Televisors could make do with a machine that had a walk that returns a moment earlier, corrected that doing so would make him fit. Looking up Dickens's book regularly made him look, carrying a pencil and paper with him to take inspiration. Shakespeare's century composer, the Scots did the same on his long hikes from Edinburgh working also about where he lived, stopping under street lamps to get down ideas that came on his journey. It's assumed that when those lamps were turned off during the war years, his music declined too. Many great people had turned social life on. One of Sweden de Beausse's close friends put it this way: "There were no newspapers, parties, it was an intellectual kind of life, a completely different kind of life, a completely different kind of life. To push the idea of Sunday was an idea of a new day."
